PODIMEKALA PRASHANTH

Jr. Software Engineer | HTML | CSS | JavaScript | CI/CD & DevOps | Cloud

Hyderabad, India | +91 9032801905 | prashanthpodimekala@gmail.com | LinkedIn | GitHub

PROFESSIONAL SUMMARY

Computer Science graduate (B.Tech – AI & ML, 2026) with strong hands-on experience in HTML5, CSS3, JavaScript (ES6+), and React.js frontend development. Built 4 production-grade full-stack web applications covering requirements understanding, development, testing, support, and documentation across complete SDLC. Proficient in CI/CD pipelines (GitHub Actions), DevOps practices, and AWS cloud deployment. Strong analytical and design thinking skills demonstrated through user-centred web application design and development. Eager to contribute as a Jr. Software Engineer, developing high-quality web applications and driving quality through testing and cross-team coordination.

TECHNICAL SKILLS

Frontend (Primary): HTML5, CSS3, JavaScript (ES6+), TypeScript, React.js, Redux — web application development & UI testing

CI/CD & DevOps: GitHub Actions (CI/CD pipelines), Docker, Git, GitHub, Version Control, Automated Build & Deployment

Cloud Platforms: AWS Certified (EC2, RDS) — cloud infrastructure, deployment, scalable web application hosting

Backend & APIs: Spring Boot, Spring MVC, RESTful APIs, Hibernate/JPA, JDBC, JWT Auth, RBAC, Maven

Languages: JavaScript (ES6+), TypeScript, Java (backend), Python, SQL

Testing & QA: JUnit (20+ tests, 85% coverage), Functional Testing, Regression Testing, Manual Testing, Postman API Testing

Databases: MySQL, PostgreSQL — schema design, SQL queries, normalization, transactions

AI & ML: Python, NLP, Deep Learning, TensorFlow, Computer Vision, Object Detection

Tools: VS Code, IntelliJ IDEA, Postman, Power BI, Maven, Gradle

Methodologies: Agile, Scrum, SDLC, Analytical Thinking, Design Thinking, Technical Documentation

PROJECTS

Task Management System — Full Stack Web Application *Jan 2024 – Apr 2024*

HTML | CSS | JavaScript | React.js | Redux | Java | Spring Boot | MySQL | JUnit | CI/CD | GitHub Actions

- Developed a full-stack web application using HTML5, CSS3, JavaScript (ES6+), and React.js — implemented responsive UI components, Redux state management, and REST API integration, meeting all client specifications across 3 Agile sprints.
- Understood and analysed user requirements; translated needs into functional designs and developed 12+ RESTful API endpoints with full documentation of specifications, design decisions, and component architecture.
- Performed comprehensive functional and regression testing — wrote 20+ JUnit test cases achieving 85% code coverage; validated all HTML/CSS/JS UI components for cross-browser compatibility, responsiveness, and boundary conditions.
- Set up and maintained CI/CD pipeline via GitHub Actions — automated build, test, and deployment workflows for continuous delivery with zero major post-production defects across all releases.
- Coordinated with team members on requirements, development progress, and testing outcomes; maintained complete documentation of design changes, test results, and deployment history for ongoing support.

Restaurant Management System — Cloud-Deployed Web App *Sep 2022 – Feb 2023*

HTML | CSS | JavaScript | Java | Spring Boot | MySQL | AWS (EC2, RDS) | Maven | CI/CD

- Developed and deployed a cloud-hosted web application on AWS EC2 and RDS — built the full frontend using HTML5, CSS3, and JavaScript; reduced order processing time by 35% through optimised UI workflows and SQL query improvements.
- Implemented role-based UI for 3 user types (Admin, Staff, Customer) with secure session management; applied design thinking and analytical skills to create clean, intuitive interface layouts meeting all functional requirements.
- Maintained CI/CD deployment pipeline and provided post-deployment support — troubleshot and fixed UI and backend defects, maintained weekly documentation of design changes, and delivered knowledge transfer for the production system.

Text-to-Speech & Speech-to-Text System — AI Web Application *Aug 2023 – Dec 2023*

Python | NLP | React.js | HTML | CSS | JavaScript | REST API | TensorFlow

- Designed and developed a React.js + HTML/CSS/JavaScript frontend integrated with a Python NLP REST API — achieved 95% speech recognition accuracy across 10,000+ user interactions with a clean, responsive web interface.
- Applied design thinking to create an intuitive voice-based web interface; optimised frontend-to-API data flow, reducing latency by 30% and improving user engagement by 25% through iterative UI/UX improvements.
- Performed end-to-end testing of the web application — validated UI functionality, API integration, error states, and cross-browser behaviour; documented test results and provided ongoing support post-launch.

CCTV Crowd Monitoring System — Automation & DevOps *Mar 2023 – Jul 2023*

Python | Computer Vision | Object Detection | CI/CD | Git | Docker

- Built an automated monitoring system with CI/CD pipeline and Docker containerisation — improved crowd management accuracy by 30% and reduced incident response time by 25% through real-time automated alerting.
- Maintained full Git/GitHub version control with automated regression testing on every build; documented all automation scripts, deployment configurations, and system architecture for ongoing support.

EDUCATION

B.Tech – Computer Science & Engineering (AI & ML) *2022 – 2026*

Malla Reddy Institute of Technology and Science | CGPA: 7.1 / 10

Relevant Coursework: Data Structures & Algorithms, DBMS, Operating Systems, Computer Networks, Software Engineering, Cloud Computing, NLP, OOP, Machine Learning, Web Development

CERTIFICATIONS

- AWS Cloud Practitioner – Brainovision (2024) | Cloud infrastructure, EC2, RDS, deployment and services
- Software Engineering Job Simulation – Accenture, Forage (2024) | Agile, SDLC, CI/CD, code review
- Front-End Software Engineering Simulation – Skyscanner, Forage (2024) | HTML, CSS, React.js, component design
- Software Engineering Simulation – Quantium, Forage (2024) | Data-driven engineering, analytical thinking
- Power BI Data Analyst – Simplilearn (2023) | Business intelligence, dashboards, data visualisation
